ANDROID DEVELOPER

KRAKEN LAB is a division of the Techno-X Group (GTX), which consists of a creative team of technological titans. KRAKEN LAB is dedicated to product development and new technologies. More precisely, KRAKEN LAB is Techno-X Group's technological innovation center.

KRAKEN LAB's mission is to help bring its clients' ideas to life and then make them flourish. From the initial analysis to the formulation of an action plan, to the implementation and measurement of effectiveness, KRAKEN LAB is dedicated to solving problems in an innovative way.

We are looking for a dynamic, self-sufficient, and motivated **Android Developer** who demonstrates leadership and is passionate about the evolution of Android technologies. A person who enjoys teamwork and multidisciplinary collaboration, and who has proven skills in developing Android systems and apps. An Android Developer who enjoys working in a fast-paced environment and wants to actively participate in that evolution. An integral team member who will be at the heart of improving our environments and the clients' products.

In this position, the candidate will be called upon to work on multiple projects involving the company's IoT (Internet of Things) products. As this field is constantly changing, we are looking for someone who can contribute new ideas and implement them.

You want to know more?

Reporting to the General Manager, the candidate's responsibilities will be to:

- Propose creative technology solutions to meet the needs of the Product Owner.
- Collaborate with UI/UX experts, business analysts, and Scrum Masters to create innovative and engaging products.
- Design reusable and efficient components that will be at the heart of complex Android apps.
- Raise technical issues and propose solutions to overcome them.
- Participate in the various facets of development: architecture, testing, optimization, evolution, and bug correction.
- Share knowledge and train other team members on design techniques and coding standards.
- Participate in Scrum methodology activities.

The candidate will be successful and gain a sense of accomplishment if they have the following skills and qualities:

- Undergraduate degree in computer science, software engineering, or other relevant training.
- 5 years of experience in development, including 3 years in mobile app development.

- Very good knowledge of Kotlin and Java.
- Previously created Android libraries or apps.
- Experience working with Git.
- Knowledge of Agile methods
- Experience working with scrum methods.
- Fluency in French and English (written/oral).

Why should you choose the Techno-X Group?

- A work-life balance.
- Schedule flexibility for early and late risers.
- Office in the Dix30 district close to all services.
- Job security in a growing company.
- Daily motivating challenges.
- A group insurance, because we want to take care of our people.

It is now your turn to tell us about yourself. All you have to do is apply!
